The citizens of Forsythe have adopted healthier lifestyles. Their responses to a recent survey show that in their eating habits they conform more closely to government nutritional recommendations than they did ten years ago. Furthermore, there has been a fourfold increase in sales of food products containing kiran, a substance that a scientific study has shown reduces cholesterol. This trend is also evident in reduced sales of sulia, a food that few of the healthiest citizens regularly eat.

 (170) for the past five years, consumers in california have been willing to pay twice as much for

oysters from the northeastern atlantic coast as for gulf coast oysters. this trend began shortly after harmful bacteria were found in a few raw gulf coast oysters. (1) but scientists have now devised a process for killing the bacteria. (2) once consumers are made aware of the increased safety of gulf coast oysters, they are likely to be willing to pay as much for gulf coast as for northeastern atlantic coast oysters, and greater profits for gulf coast oyster producers will follow. (3)

1. maybe bacteria was not the sole cause or the only determining factor of the trend. possibly people are paying more because of taste.
2. it doesn't consider quality of oysters that is probably the most important factor when people choose and buy.
3. what if killing the bacteria costs a lot?
